The Don Dunstan Foundation and the Australian Institute for Social Research is proud to present

Dr Clyde Hertzman

who will present

"INVESTING IN OUR CHILDREN, INVESTING IN OUR FUTURE"
on Tuesday 27th September at 10:30am

Extensive research has demonstrated that social determinates make a difference to everyone's health. It can be difficult to understand how social conditions actually impact on biology.

Dr Hertzman has played a central role in creating a framework that links population health to human development, emphasizing the special role of early childhood development as a determinant of health. His research has contributed to international, national, and community initiatives for healthy child development. Dr Hertzman is a passionate advocate and enthusiastic presenter, and has recently been awarded the highest scientific honour in Canada as Health Researcher of the Year.

Dr Hertzman is Director of the Human Early Learning Partnership (HELP), College of Interdisciplinary Studies at UBC. HELP has recently been designated by the World Health Organization as the Knowledge Hub on Early Child Development. He also serves on the Scientific Advisory Board of the Harvard Center for Society and Health; the Steering Committee of the Canadian Population Health Initiative; the Presidential Search Committee of the Canadian Institutes for Health Research; and is a member of the European Science Foundation’s Program on Social Variation in Health Expectancy.
